Team ID	
Project Title	A Comprehensive Measure of Well-Being
Maximum Marks	5 Marks

Project Proposal (Proposed Solution) report

The proposal report aims to transform loan approval using machine learning, boosting efficiency and accuracy. It tackles system inefficiencies, promising better operations, reduced risks, and happier customers. Key features include a machine learning-based credit model and real-time decision-making.

Project Overview	
Objective	To revolutionize socio-economic development tracking by implementing a machine learning-based prediction model that provides accurate, real-time HDI forecasts.
Scope	The project comprehensively assesses and enhances development forecasting by using multiple socio-economic indicators (Life Expectancy, Education, GNI) to create a robust and efficient prediction system.
Problem Statement	
Description	Current reliance on reactive, historical data and slow manual reporting creates inefficiencies, leading to potential misallocation of government funding and policy blind spots.
Impact	Solving these issues will result in proactive policy planning, datadriven budget allocation, and an overall enhancement in national development strategies, contributing to better citizen well-being.
Proposed Solution	

Approach	Employing supervised machine learning regression techniques (Linear Regression) to analyze historical socio-economic data and predict future HDI scores.
Key Features	- Implementation of a machine learning-based HDI assessment model. - Real-time decision-making for quicker analytical insights. - User-friendly dashboard for policy-makers and researchers.

Resource Requirements

Resource Type	**Description**	**Specification/Allocation**
Hardware		
Computing Resources	CPU/GPU specifications, number of cores	Intel Core i3 or above
Memory	RAM specifications	Minimum 4 GB
Storage	Disk space for data, models, and logs	Minimum 10 GB free space
Software		
Frameworks	Python frameworks	Flask
Libraries	Additional libraries	scikit-learn, pandas, numpy, matplotlib, seaborn
Development Environment	IDE	Anaconda Navigator, Jupyter Notebook or Spyder
Data		

Data	Data Source/Size	UNDP/World Bank HDI Datasets
